And power-play between IT directors, data security managers, heads of HR and others leads to a fight for budget and a flight from responsibility that potentially constitutes a cyber risk in itself. So how can CEOs determine the best way forward? Governance, accountability and ownership. Effective cyber governance is about: strategy and vision

Governance, Accountability and Ownership of Cybersecurity

And no accountability program (or security program, for that matter) will succeed without support from the top. But support from the top only works if the rules are clear. The boundaries and limits of responsibilities must be clear. If you leave a gap, a breach could fall into it.
