How Economics Shapes Science — Paula Stephan | Harvard ...

This is a book about how economics shapes science as practiced at public research organizations. In the United States these are primarily universities and medical schools. But in Europe and Asia a considerable amount of public research is conducted at research institutes. The book's focus reflects the strong role that public research organizations play in creating knowledge.

How Economics Shapes Science on JSTOR

How Economics Shapes Science offers a good descriptive overview of the current state of how science is conducted (mainly in the US). But Stephan doesn't dig into much of the economics, describing some of the basic problems, such as poor incentives or misallocation of time and money but not pursuing some of the economic reasons behind many of these (or the adjustments that could be made to change/correct them).

How Economics Shapes Science - Paula Stephan

"How Economics Shapes Science" I recently finished a very interesting and useful book entitled, "How Economics Shapes Science," written by the economist Paula Stephan (Professor of Economics, Georgia State University and a member of the National Bureau of Economic Research).

Review: "How Economics Shapes Science," by Paula Stephan ...

the undisputed authority on the economics of science and her book is a delight.

How economics shapes science. (Book, 2015) [WorldCat.org]

I recently finished a very interesting and useful book entitled, “How Economics Shapes Science,” written by the economist Paula Stephan (Professor of Economics, Georgia State University and a member of the National Bureau of Economic Research). Stephan is an economist who accidentally became an expert in science economics, a little vignette that sets a nice tone for the book, which is superb overall — well-written, smartly structured, and well-referenced.

Revisiting a Book Review: How Economics Shapes Science by ...

Her book How Economics Shapes Science was published by Harvard University Press, 2012 and has been translated into Chinese and Korean. An earlier book, Striking the Mother Lode in Science (co-authored with Sharon Levin) was published in 1992 by Oxford University Press.
