Solution. more ... A value, or values, we can put in place of a variable (such as x) that makes the equation true. Example: $x + 2 = 7$. When we put 5 in place of x we get: $5 + 2 = 7$. $5 + 2 = 7$ is true, so $x = 5$ is a solution. See: Variable.

A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent. The particles of solute and solvent are molecules or ions, with one or more solvent molecules bound to each solute particle.
