Development

The simple answer is that the sounds used in speech are the speech sounds. For speakers of English, for example, the sound /b/ is readily recognizable as a speech sound because we have heard it spoken at the beginning of words such as ball, boy, bus and bat. We have also heard it at the ends of words such as cab, lab, dab and crab.

What is a speech sound? - SLT info

The Speech-EZ ® Apraxia Program Parent Manual provides education and instruction for working with children who have apraxia or severe phonological disorders.

Materials - The Speech-EZ® Apraxia Program

This manual helps speech-language pathologists evaluate the degree to which motor speech impairment contributes to severe speech sound disorder in young children ages three and older.
