World Without Fish: Kurlansky, Mark, Stockton, Frank ...

Mark Kurlansky in his book, World Without Fish, explores this idea, showing us how we got to this critical point in the population of fish, what a reduction of fish population would mean for the rest of our world's species, and how we can change this trend.

World Without Fish - Home

"Most of the fish we eat, most of the fish we know, could be gone in the next fifty years" (Kurlansky XI). A World Without Fish starts out with this statement. This quote is what the whole book is about: the possible extinction of fish, why this could happen, and what we as humans can do about this.

Chapter Summary - A World Without Fish Analysis

A World Without Fish is a nonfiction and very readable book that approaches the concept of what the Earth would be like without fish.The author, Mark Kurlansky, expresses findings from Charles Darwin and other naturalist scientists as evidence throughout the book.

A World Without Fish Analysis - Home

From WORLD WITHOUT FISH (Workman Publishing) by Mark Kurlansky: It was in the North Sea in the late nineteenth century that innovations in fishing began to take place. The North Sea is a body of water rich in fish, which is surrounded by the great European fishing nations, such as Scotland, England, France, Belgium, The Netherlands, Denmark, Germany, Sweden, and Norway.

World Without Fish - Wonders & Marvels

Kurlansky makes his final point about the situation, saying, "But at least the fundamental debate was now over. There could be no denying that overfishing was a real threat" (Kurlansky 75). Overfishing was then viewed as problem not just done by foreigners and a grim reality that comes with commercial fishing, as even locals could damage one of the largest stocks that ever existed.

Chapter 5 - World Without Fish

In this chapter Kurlansky's main point is scientists are sometimes wrong, and so are fisherman. Scientists used to believe that fish were not at risk of extinction because of how many eggs they lay, but they were wrong. Only 1-6 babies will survive out of all of the eggs layed by a fish.
